

Task Overview:

The goal of this task is to develop a pixel-perfect and fully responsive implementation of the provided Figma design using the specified tech stack. The candidate should focus on the following:

Objective & Expectations:

- Ensure pixel-perfect accuracy to match the Figma design.
- Deliver a fully responsive layout across different screen sizes.
- Maintain an organized folder and component structure.
- Write clean, readable, and maintainable code.
- Use best practices in React and Tailwind CSS.
- Optimize for accessibility and performance where possible.

You're encouraged to go beyond the design and add enhancements or additional features if desired. The figma link is
